## SKILLS

React

HTML

CSS

Javascript

Redux

NodeJs

C

C++

Problem Solving

git

Github

Mongodb

Ethereum

## LANGUAGES

English

*Professional Working Proficiency*

Nepali

*Full Professional Proficiency*

Maithli

*Native or Bilingual Proficiency*

## INTERESTS

Writing

Board Games

Cooking

Music

Paintings

# Pankaj Shah

Student , React Developer, MERN stack developer

Final year student at Advanced college of Engineering and Management looking forward to work the team where my knowledge and skill will better come to work.

## EDUCATION

### BE in Computer Engineering

Advanced College of Engineering and Management

*10/2016 - Present*

### Higher Secondary(+2)

Arniko Awasiya Higher Secondary School Biratnagar

*05/2013 - 05/2015*

### SLC

Sagarmatha Higher Secondary School Biratnagar

*06/2013*

## PERSONAL PROJECTS

### Corona Tracker Nepal

- Created using React, Material UI and ChartJs
- NepalCorona.info Open Data API by AskBhunte
- Shows real time covid-19 status of Nepal with Standard data graphs
- Code available at <https://www.github.com/paankajshah/coronatrackernepal>

### MERN Login/Signup

- Developed using MERN stack(Mongodb, Express, React and NodeJs)
- Redux is used to manage global state
- 2FA(factor authentication) is enabled using nodemailer
- Framework used is bootstrap
- Code available at [https://github.com/Paankajshah/mern\\_otpbased\\_login-signup\\_using\\_react\\_and\\_redux](https://github.com/Paankajshah/mern_otpbased_login-signup_using_react_and_redux)

### Lottery system using Blockchain

- Developed using React.
- Truffle suite is used as development environment for blockchain
- Terms of the agreement between player and admin being directly written into lines of code using smart contract
- Keccak algorithm is used to randomly pick winner by admin
- Code available at <https://github.com/Paankajshah/Simple-Lottery-System-using-Blockchain>

### E-voting using Blockchain

- Developed using MERN stack.
- Redux is used to manage global state
- Bootstrap framework is used
- Truffle suite is used as development environment for blockchain
- Code available at <https://github.com/Paankajshah/voting>

### My Portfolio

- Developed using React

NOTE : For the details about the projects please visit my website <http://pankajshah.me>
